SUMMARY :

I am a software engineer, with desires of developing AI. I have a background in the automotive restoration/repair industry and client relations. I solve large complex problems by splitting them into smaller simple ones. My passions is to always be learning something new and am very curious about the new and the unknown. One of the biggest values I offer is integrity, being ethically unyielding and honest and inspiring trust by saying what I mean, matching my behaviors to my words and taking responsibility for my actions.

PROGRAMMING LANGUAGES, FRAMEWORKS. LIBRARIES :

My current skill set that is forever growing and developing :
Javascript, Python, C++, Jquery, HTML, CSS, Node.js, Express, React, Django, Redux, MongoDb, Postgresql, SQL, No-SQL Mongoose, Markdown, JSX, JSON, CLI, NPM,

Managing part orders, insurance company claims, customer relations, and worker work flow
to ensure needs of all involved are satisfied so repairs from start to finish are a smooth
transition.

EDUCATION

<u>University of State, City, State</u> — Degree, Year
<u>General Assembly, Online - Full Stack Immersive</u> — 2020
<u>New Britain High School - High School Diploma </u>— 2011
<u>Body Technician Apprenticeship - Onsite</u> — 2008 - 2011

PROJECTS

- <u>Steam</u> <u>Room</u> - Personal Project - MERN Stack - Based around a spin off of 'break room',
  online forum style, focusing around today's issues revolving around lack of time and ability
  to work/talk through ongoing problems one may encounter. Steam Room provides a safe
  help space to be able to voice one's problems and get help/feedback from other members
  on the site.

- <u>Wayfarer</u> - Collaborative Project - Django - A travel destination site, allowing users, guests
  to add site seeing or activities pinned to different locations in the U.S.

- <u>CRUD</u> - Collaborative Project - Node, Express, EJS, Mongodb - Stands for Connect,
  Resources, Unite Developers, a blog like app where users can create their profiles and
  populate them with a tech stack that they are using or would like to learn more about.
  Focus on bringing solid, useful documentation without any filler or rabbit holes that lead no
  where to its users.

- <u>User</u> <u>Stories</u> - Personal Project - Node, Express, Handlebars, Mongodb - One of my first full
  stack applications, a basic blog site where users can create their own accounts and
  populate a board with life stories they have been through, and other users are able to
  comment and like on specific stories.
